Description

TITAN™

TITAN V2 Basic Module – the best if you long for having TITAN in two or more airsoft guns. Then you do not need the second USB-Link from the Advanced set. It includes TITAN with **BASIC** firmware edition.

The BASIC firmware edition is an **economic version** with limited number of functions, dedicated for those who prefer simplicity but require highest quality. If you decide to have more functions, there is always option to [upgrade firmware from BASIC to ADVANCED or EXPERT](#).

Kit contents:

1. TITAN V2 with BASIC firmware edition (rear or front wired)
2. Installation Kit
3. Quickstart Guide

NOTICE! In order to configure TITAN, you need the USB-Link or Tactical Programming Card which is not included in this kit.

TITAN V2™ is an AEG Control System for V2 gearboxes which will transform your AEG into an advanced training weapon. Adjust your AEG using USB-Link and GATE Control Station App for PC, Mac and Android devices. Gain a tactical advantage thanks to the extremely fast trigger response, option of adjusting trigger sensitivity to your preferences and many other useful functions. Give your AEG a new lease of life!

Thanks to the optical sensors, we eliminated the problem of faulty switches that can occur in competitors' drop-in MOSFETs. The trigger has no mechanical connections with the PCB. This eliminates mechanical stresses and provides for high reliability.
